

MINING

NORTH BAY

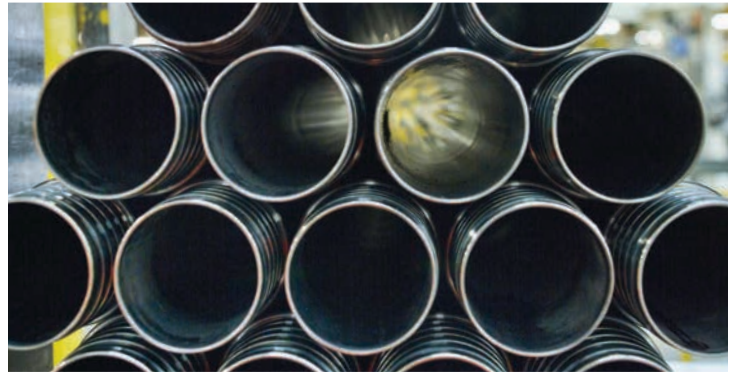

ONTARIO • CANADA

TECHNOLOGY

Canada is a natural resources powerhouse supplying the world with the raw materials necessary to produce the goods we need on a daily basis.

Over 45% of Canadian suppliers of specialized mining goods and services are from Ontario. The mining world looks to Northern Ontario for innovation and the cutting edge technology used by North Bay firms is deployed all across the globe.

EXPERTISE

North Bay, Ontario, Canada is home to global leaders in the mining exploration and mining supply and services sector. Over 60 such businesses call North Bay home with a growing list of multinational headquarters.

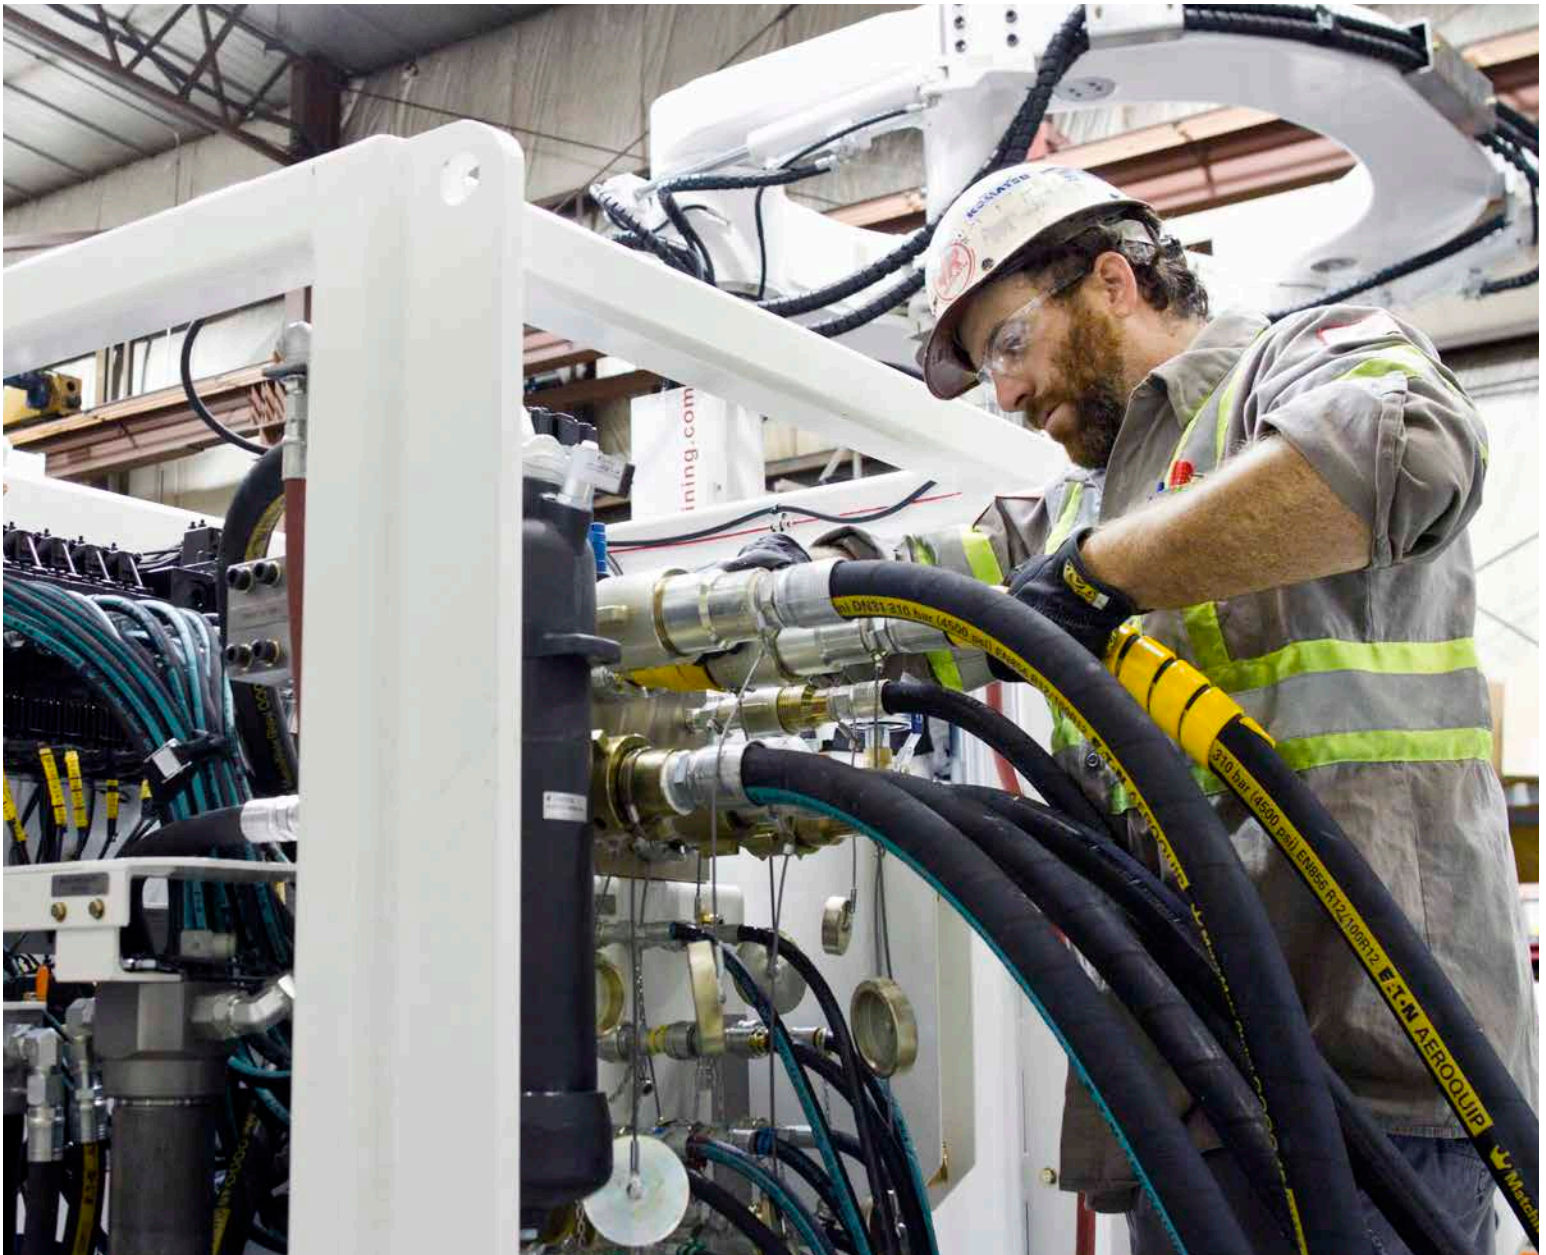

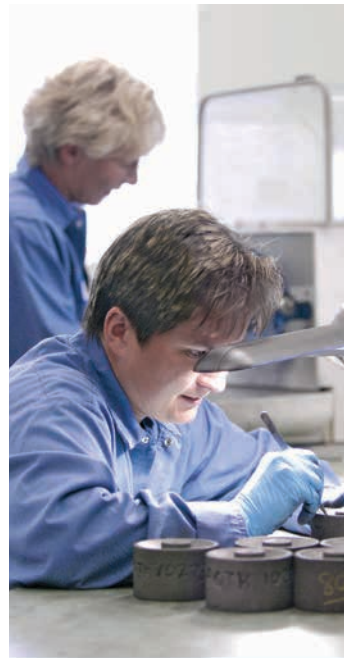

Our firms have expertise in:

- Mining exploration and development, design, build and mine operating services
- Fabricated metal machinery and equipment, including both track and LHD
- Fabricated rubber, plastics and chemical products specific for mining
- Wholesale equipment and supplies
- Business services including engineering and geo-technical

WORKFORCE

Two-thirds of Ontario mining jobs are located in Northern Ontario. North Bay boasts a highly skilled workforce who bring high productivity, innovation and entrepreneurial spirit to work every day. Our firms are proud to have less than 5% staff turnover and correspondingly low rates of absenteeism. North Bay is home to both unionized and non union shops; workplace and work flow disruptions are minimal.

LOCATION

More than one-third of Ontario's mining supply and services companies are located in Northern Ontario; North Bay is located at the centre of it all. Economic growth in North Bay is linked to the city's close proximity to markets for both manufactured goods and the raw materials needed to produce them.

Located a 3.5 hour drive from Toronto or Ottawa, the city is centrally located at the crossroads for road, air, rail and fibre optic routes. This provides a link to the north, south, east and west for transportation and communication activities.

North Bay is the ideal location for businesses, seeking a low cost operating environment, highly skilled workforce, and easy access to markets.
